

POST-16 COURSE OVERVIEW

INFORMATION TECHNOLOGY

QUALIFICATION	AWARDING BODY	COURSE LENGTH
Level 2 Cambridge Technical in IT	OCR	1 year

COURSE OVERVIEW

A practical course where you will design and build digital products used by real businesses. You will create websites and develop mobile applications, building a portfolio of work as you progress. Each project is hands-on, so your grade reflects what you can create, not simply what you can remember. The course suits students who prefer practical, project-based learning and want to develop their IT skills and confidence before progressing to further study, an apprenticeship or employment.

WHAT WILL I STUDY?

KEY CONTENT	ASSESSMENT
- Unit 13: Creating Websites - Unit 14: Creating Mobile Applications for Business	- Assessed through practical assignments rather than exams - Work is marked in school and moderated by OCR - Portfolio of website and mobile application projects

WHERE COULD THIS COURSE TAKE ME?

This course supports progression to Level 3 IT, computing or digital courses at school or college, IT and digital apprenticeships, or entry-level roles in web design, application development or IT support. The portfolio you build provides practical examples of your work to use at interviews and can help you decide on your next step in IT.
